Projects Worked on :

Infosys experience:

Title: FendtOne CEP – Customer Experience portal

Angular 7+ developer, developed dashboard, 3 main modules of this portal.

Description: Fendt.One is an application to provide smart farming using modern technologies. It provides a modern way to work on a farm with features such as manage fieldwork, machines and staff create jobs and send them to the terminal in the tractor cab.

Responsibilities:

1. Used **NPM** for installing required node modules and other published **Angular NPM modules**.
2. Worked Extensively with **Angular CLI** for creating components, Services, pipes, Directives.
3. Updated the application with new features of **Angular 9**.
4. Designed and developed the application using **Angular 7** framework along with **HTML5, CSS3, Type Script, Java Script, Bootstrap, NPM**.
5. Moved existing **Angular 7 to Angular 9 components** for using latest updates in angular.
6. Developed single page application using **Angular 7, Typescript, web pack**.

7. Worked with **gulpfile** for local data setup in stub
8. Have written **Jasmine unit test** cases.
9. Worked on **CSS Background, CSS Positioning, CSS Text, CSS Border, CSS Margin, CSS Padding, CSS Table, Pseudo Elements & Classes, and CSS Behaviors in CSS.**
10. Involved in agile software methodologies.
11. Used Microsoft's **Azure** to keep track of **bugs** to reduce **downtime, increase productivity, and communication.**

Environment: Angular 7/9, Angular CLI, TypeScript, JavaScript, NPM, Bootstrap, HTML, CSS, GIT, Jasmine, Karma, LESS.

Title: Valtra CP - Customer portal

AngularJS developer, developed notifications, 2 main modules of this portal.

Description: Valtra is a manufacturer of tractors and agricultural machinery and forms part of the AGCO Corporation.

Responsibilities:

1. Used **NPM** for installing required node modules and other published **AngularJS NPM modules.**
2. Designed and developed the application using **AngularJS** framework alongwith **HTML5, CSS3, Java Script, Bootstrap, NPM.**
3. Worked with **gulpfile** for local data setup in stubs.
4. Have written Jasmine test cases to increase the code coverage.
5. Used Microsoft's **Azure** to keep track of **bugs** to reduce **downtime, increase productivity, and communication.**

Environment: Angular JS, JavaScript, NPM, Bootstrap, HTML, CSS, GIT, Jasmine, Karma, LESS.

Apptivo Experience:

Financial Applications

Title: Invoice

Description: An invoice is a commercial document that itemizes a transaction between a buyer and a seller. Payment terms are usually stated on the invoice. These may specify that the buyer has a maximum number of days in which to pay and is offered a discount if paid before the due date. The buyer could have already paid for the products or services listed on the invoice and provide information on the available methods of payment (Authorize.net, Stripe and Paypal).

Responsibilities:

1. Involvement with the business users for requirements elicitation.
2. Preparation of Functional description document and plan work based schedule for the assigned development works accordingly.
3. Impact analysis and delivering assigned works on time.
4. Involvement in the core development works.
5. Involvement in the systematic improvement plan of the existing application.
6. Before deployment of the modified code to the production server, UAT is always taken into consideration.

Environment: Html5, CSS, AngularJS, Core java, Elastic search, PostgreSQL.

Title: Kit orders

Description: A kit order is for a company who sells products, and it allows them to combine estimates, purchase orders, supplier, invoices, and invoices to your customer into a single page for calculating margins.

Responsibilities:

1. Involvement with the business users for requirements elicitation.
2. Preparation of Functional description document and plan work based schedule for the assigned development works accordingly.
3. Involvement in the core development works.
4. Before deployment of the modified code to the production server, UAT is always taken into consideration.

Environment: Html5, CSS, AngularJS, Core java, Elastic search, PostgreSQL.

Title: Customer Payments

Description: The Customer Payments App is a place to store all records of payments received from customers. This app works together with the Invoices App to separate billing from payment collection based on payment methods as like online payments (A.net, Paypal, Stripe).

Responsibilities:

1. Involvement with the business users for requirements elicitation.
2. Preparation of Functional description document and plan work based schedule for the assigned development works accordingly.
3. Involvement in the core development works.
4. Before deployment of the modified code to the production server, UAT is always taken into consideration.

Environment: Html5, CSS, AngularJS, Core java, Elastic search, PostgreSQL.

Academics

2015 Graduate in B.E (Computer Science) from K.L.N College Of Information Technology with CGPA 6.7

Achievements:

- Awarded with **Insta award** thrice in Infosys.
- Awarded as **Star Performer** many times.
- Highest Performer in Infosys.
- Appreciated by Client for single handedly making website ready for biggest agriculture fest '**Agritechnica 2019**'.
- Appreciated by Client for developed a module with zero defect.
